PROFESSIONAL SUMMARY

Technology professional with 10 years of experience across technical communication, requirements and stakeholder collaboration, including data workflows, analysis, and platforms. Hands-on SQL, Python, data visualization and business intelligence skills, supported by independent analytics projects. Translates datasets, system workflows, and user needs into clear, usable information.

CORE SKILLS

Data and analytics: SQL (PostgreSQL), Python, Pandas, NumPy, exploratory data analysis (EDA), data cleaning, Tableau, Matplotlib, Seaborn, Plotly

Business analysis: Requirements gathering and analysis, process mapping, requirements traceability, user acceptance testing (UAT), stakeholder collaboration, change management

Tools and technologies: REST APIs, JSON, Git/GitHub, Jupyter, VS Code, Excel, Postman/Swagger, Jira, Confluence, Azure DevOps, DITA/XML, Adobe Experience Manager

SELECTED ANALYTICS PROJECTS

Home Alone Grocery Run Analysis

Python | Pandas | PostgreSQL | SQLAlchemy | Streamlit

- Built an affordability analysis using grocery prices, CPI and BLS wage data; stored data in PostgreSQL and queried it through SQLAlchemy for Python analysis.
- Reconstructed 1990 item prices and modeled the basket from 1990 to 2026 using CPI, documenting assumptions and the limitation of applying one inflation rate across products.
- Found modeled work required fell from 2.04 to 1.64 hours despite higher basket prices, using national production/nonsupervisory-worker earnings; presented comparisons in Streamlit.

Ride-App Analysis

Python | Pandas | Matplotlib | Seaborn | Scikit-Learn | Gradio

- Joined ride requests with weather API data and compared completion, cancellation and vehicle-unavailability rates by pickup location and time of day.
- Identified contrasting failure patterns: City cancellations concentrated around dawn and morning, while Airport pickups faced evening car shortages, suggesting different supply-planning priorities.
- Trained a Random Forest to predict completed, cancelled or no-car-available outcomes from pickup point, hour and weather; built an interactive Gradio app and documented the limited historical coverage.

Titanic Survival Analysis

Python | Pandas | Plotly Dash | Scikit-Learn

- Explored passenger survival patterns and engineered family-size and solo-travel features; built a preprocessing and logistic-regression pipeline for binary survival prediction.
- Recorded 79.3% accuracy on a stratified 20% holdout test set; evaluated precision, recall, accuracy, and F1.
- Built a multi-page Plotly Dash app with exploratory charts and passenger-level survival estimates, explaining missing-data treatment and the distinction between association and causation.

Additional projects: Tableau dashboards; Barista Brews CRUD API built with Python, FastAPI and Pydantic.

PROFESSIONAL EXPERIENCE

Senior Technical Writer | TransUnion - OneTru

Nitor Ascendion Private Limited | Contract assignment | Jul 2024 - Apr 2026

- Created technical guidance for OneTru users and customers, focused on analytics and research capabilities; authored structured DITA XML documentation in Adobe Experience Manager.
- Translated data-platform workflows into user guidance, building familiarity with SQL, APIs, data cleaning, exploration, profiling, configuration, modeling and quality.
- Developed understanding of data storage and compute, access groups, and data sovereignty and residency; strengthened Python skills within the data-platform environment.
- Gained exposure to the credit-data lifecycle and how aggregation, sharing, analysis and modeling support products and business decisions.

Assistant Manager | Change Management

Deloitte USI | Jan 2023 - Feb 2024

- Gathered documentation and training requirements from member-firm stakeholders; translated inputs into user guides, process flows, quick-reference materials and change-enablement toolkits.
- Developed the user manual for the GIGA Access Management module within a SailPoint-based Identity and Access Management / Privileged Access Management (IAM/PAM) initiative.
- Coordinated stakeholder reviews and sign-offs, and supported communication planning, stakeholder analysis and change-readiness activities for enterprise deployments.

Information Process Enabler | Technical Writer | Copywriter and SEO

Tata Consultancy Services (TCS) - GE Healthcare | Sep 2018 - Dec 2022

- Collaborated with developers, architects and engineers to understand product requirements and documentation needs for GE Healthcare's Defect Management System and related software.
- Authored User Requirement Specifications (URS), Software Requirement Specifications (SRS), Test Summary Reports and Traceability Matrices for system validation, plus user and administrator guides.
- Aligned documentation releases with SDLC/Agile checkpoints, coordinated validation sign-offs, and participated as a tester in dry runs, user acceptance testing (UAT) and new-feature deployments.

Tata Consultancy Services (TCS) - Hibu | Mar 2017 - Sep 2018

- Wrote and proofread website content for US small businesses; created and quality-checked SEO tags.

Assistant Manager | Content / Script Writing

Shemaroo Entertainment | Apr 2015 - Mar 2017

- Developed promotional and interactive content with production teams; reviewed junior writers' work and supported metadata and video descriptions.

EDUCATION

Bachelor of Business Management Studies, Finance | University of Mumbai | 2011
